

CS Energy is a Queensland Government owned energy provider with a unique mix of technology and an innovative approach that is powered by experienced, skilled and talented people. We strive to deliver a sustainable and commercially viable future for our organisation, our employees and the people of Queensland.

Our generating portfolio includes the 1,720 megawatt (MW) coal-fired Callide Power Station near Biloela in Central Queensland, the 750 MW Kogan Creek Power Station near Chinchilla in South West Queensland, and the 500 MW pumped storage hydro electric Wivenhoe Power Station near Esk in South East Queensland.

Callide Power Station

- Location:** Biloela, Central Queensland
- Capacity:** 1,720 MW
- Fuel:** Black coal from Anglo Coal Mine
- Employees:** Approximately 180 employees
- Configuration:** Callide A (120 MW)
Callide B (700 MW)
Callide C (900 MW), owned in a 50% joint venture with InterGen

Callide Oxyfuel Project

Callide Oxyfuel Project – Callide A Power Station is home to the Callide Oxyfuel Project, a world-leading demonstration of how carbon capture and storage can be applied to existing power stations to produce electricity from coal with near-zero emissions.
