

MEDIA RELEASE

28 June 2005

New Site Manager for Mica Creek Power Station

Steve Davison has been appointed Site Manager at the Mica Creek Power Station.

Currently Asset Manager at the Station, Steve came to Mount Isa in January 2005 after more than twelve years in the power industry in the UK and Malaysia.

“This is an exciting time in the North West Region of Queensland with the increased global demand for minerals and I’m looking forward to the challenge of meeting the needs of local businesses as they expand to meet these global requirements,” Mr Davison said.

CS Energy General Manager Operations, Ron Roduner, said he was delighted that Steve had accepted the position.

“CS Energy is in Mount Isa for the long haul. We are the only large scale electricity generator in the region and have been upgrading and expanding the plant over the last few years. We are looking at options for further upgrades to ensure that we can continue to provide a clean and reliable service to our customers.

“Steve’s background in engineering and maintenance means he will bring a valuable combination of strategic and practical understanding to these decisions,” Mr Roduner said.

During his career, Steve worked as a Marine Engineer with both Shell and BP Exploration before accepting a position with ALSTOM Power in the UK as Mechanical Engineer. He has also held senior operations positions running large modern gas-fired power plants in the UK and Malaysia.

He has moved to Mount Isa from Malaysia with his wife Catherine and three of their children.
