

Timeline of activities (updated April 2024)

NOV 2020 - APR 2021

Initial investigations & public notification Start sampling landholder properties Zone 1 to 5 sampling and results Community walk-in session

OCT 2021 - MAR 2022

Community walk-in session
Technical monitoring round 1 & 2
Second round of landholder sampling zones 3–6
Planning for soil remediation at source areas on site at Callide Power Station

OCT 2022 - APR 2023

Round 3 landholder sampling all zones Technical monitoring round 5 Aquatic biota sampling in February

POST JUNE 2024

DESI provides feedback on EE submission
Ongoing quarterly monitoring

Structures to monitor water flow from north of site installed Additional seepage recovery pumps and bores installed Sediment removal at Callide A

Ongoing management of remediated source areas on site HHERA complete and assess need for further action following HHERA

OCT 2023 - FEB 2024

Filtration trial monitoring

HHERA work continues

Technical monitoring round 7

Landholder sampling round 4 all zones

MAY 2021 - SEPT 2021

Technical monitoring program developed Expand landholder sampling to zone 6 Second round of landholder sampling commences in zones 1 & 2

APR 2022 - SEP 2022

On site soil and concrete remediation at source areas Hydrogeological review completed Technical monitoring round 3 & 4 First filtration trial set up

Initial Environmental Evaluation (EE) submission to Department of Environment and Science (with identified data gaps)

MAY 2023 - SEP 2023

Technical monitoring round 6

Drilled 11 new recovery bores to minimise seepage off site

Aquatic biota sampling report delivered and published Community walk-in session

Human Health & Ecological Risk Assessment (HHERA) work commences

Continuation of soil and concrete remediation at source areas

CS Energy request for extension for additional EE submission (to complete further investigations and close out data gaps)

(We are here)

MAR 2024 - JUN 2024

EE submitted to Department of Environment and Science & Innovation (DESI) with further investigation findings

DESI reviews EE submission

Technical monitoring round 8 (end April)

Landholder sampling round 4 complete (end April)

Ongoing communication with landholders and community stakeholders

*anticipated timeline subject to change
